Afterglow

Five huge lines of evening poetry: the one at the centre of the screen glows, the others blur and fade away.

{ how it works }

Copy. Paste. Done.

1. Copy the prompt
2. Paste it into your AI
3. Add your photos and words

Prompt

Copy the prompt

```
Build a draggable card stack in
vanilla HTML, CSS and JS with GSAP
3.13 core from cdnjs. Do not use
Draggable; use pointer events and
gsap.quickTo.

Markup: a section with a heading,
a counter element, a hint line,
and a focusable stack containing 6
figure cards, each with an image
and a caption.

Drag: pointerdown on the top card
only...
```

{ proof }

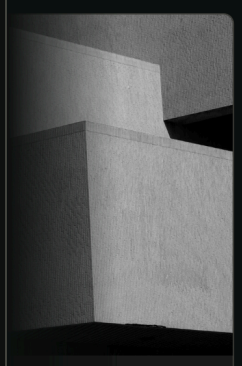

Five full example pages, built the same way.

{ Showreel }

Built with the kit

Five example pages, each using a different mix of recipes. Hover a card to preview it, click to open it.
